

Room 138

Winter 2017

February 13

Literacy Studio

In Literacy Studio, we have continued our Determining Importance unit. Students have used close reading to determine the main idea and important information within informational text. They have used this information to write summaries of various articles. Soon we will be starting our study of opinion based writing.

Math Workshop

In math we finished our very long unit on fractions! The students mastered the concepts of equivalent fractions, simplifying, comparing, adding and subtracting mixed numbers, and multiplying fractions by a whole number. We will now begin our next unit on decimals!

Team Building

In Team Building, we worked together to play a fun game of finish the picture. The students were to draw using three colored pencils for a minute. When the music stops, the students rotate and continue drawing on someone else's picture. This was difficult but fun!

Science/S.S.

In science, we finished our research on natural disasters. As a group, the students constructed models that showed how to reduce the damage of a natural disaster. We are now beginning our S.S. unit on
