

Room 138

Fall 2016

September 9

Literacy Studio

In Literacy Studio we have worked on building our reading stamina. We are already up to 30 minutes! We have also discussed how to choose just right books. The students practiced this skill during a book walk with using our class library. We are beginning to set our reading goals for the school year as well.

Math Workshop

In Math we are discussing Place Value. We have worked on determining values of digits, ordering and comparing numbers, determining patterns, and adding and subtracting. We will take our test next week.

Team Building

During Team building so far we have completed two activities. In the first week of school we saved Fred! Students had to find a way to get a gummy worm on top of a cup into a gummy lifesaver under the cup using only paper clips! The students worked in groups and each group was successful. The next two weeks we worked in teams again to building a structure out of straws, tape, and string that could hold up a book.

Science

In science we are learning about structures and functions. We used everyday objects to help us determine what structures and functions are, and we transferred that knowledge to structures and functions of plants.

Important Dates

Picture Day- 9/14 (1:55)

Bulldog Bash- 9/23 (6:00-8:00)
