

Room 138

Fall 2016

October 27

Literacy Studio

In Literacy Studio, we began our Schema Unit. We have started by worked on identifying theme. We started by identifying themes in short texts as a class, and have moved on to looking for evidence of a theme within our realistic fiction books. We have applied these concepts to our writing as well. The students have also set up their blogs!!

Math Workshop

In Math we finished our chapter on factors and multiples and have begun multiplication. We began this unit with some basic fact practice and multiplying by one digit numbers. The students have now moved into multi digit by multi digit multiplication. Extra fact practice is always helpful. 😊

Team Building

In Team Building, we have completed a few more activities. The students worked together to create a tower made only from post it notes. This was very challenging, but students did a great job working together. They also had a challenge involving pipe cleaners.

Science/S.S.

As our science unit came to an end, we discussed various structures and functions of animals. The students were given the opportunity to observe live birds right here at school! We are now moving into our S.S. unit, landforms.

Important Dates

October 31st – Halloween!

November 11th – Veteran's Day

No School
