

Room 138

Spring 2017

May 17

Literacy Studio

In Literacy Studio, we have been working on our inferring skills. We began by using wordless pictures to infer meaning, theme, and emotions in the text. We have now moved on to books with both pictures and words and we have been using our inferring skills to understand characters traits and motivations. We will tie this skill into writing our photo essays!

Math Workshop

In math we completed our angles unit and our perpendicular/parallel lines unit. We used protractors, drawing triangles, and rulers to identify and draw parallel and perpendicular lines. We are now moving into our unit on squares and rectangles. The students have started by identifying the properties of these quadrilaterals.

Team Building

This month we have worked on a few fun teambuilding activities! One of the activities involved a track, pompoms, and straws. The students had to work together to blow the pompom through the track (pictured above). Another involved a few materials to design a marble track. Both were difficult but fun!

Science/S.S.

In social studies we began our study of colonies by reading about the lost colony of Roanoke. We have completed our research of the first American colonies and will soon move on to making our colony commercials!

Important Dates

May 29th - Memorial Day (No School)
