

Room 138

Winter 2016

December 2

Literacy Studio

In Literacy Studio, we finished up our Schema Unit and began our study of short stories. Students identified the components of a short story. They listened for common themes and various writer's crafts. We are now creating our own short stories. Students are using their research abilities to gather schema on their topic and have begun putting their story together.

Math Workshop

In math we finished our chapter on multiplication and we have started our chapter on division. We began this unit with some basic fact practice and an introduction into long division. The students have now moved into finding quotients with remainders within long division problems. Extra fact practice is always helpful. 😊

Team Building

In Team Building, we have completed a few more activities. The students worked together to connect with each other's stories. This connection game was very difficult because it involved listening and understanding others perspectives. We also worked together as a whole class to create a lip dub to the song "Happy".

Science/S.S.

As our social studies unit came to an end, we discussed landforms and features of the earth. The students were given the opportunity to create comic life projects on landforms, and identify the different parts of the earth with their model globes.

Important Dates

December 9th - Winter Sing

December 23rd - No School (Winter Break Begins)
